UNLEASH talent creates 'lollipop-like' Covid-19 testing device

SEPTEMBER 17, 2021

UNLEASH Talent Co. CEO Steve Hines, and UNLEASH Talent startup founder David Hines, with UNLEASH Talent's COVID-19 testing device with 95% accuracy.

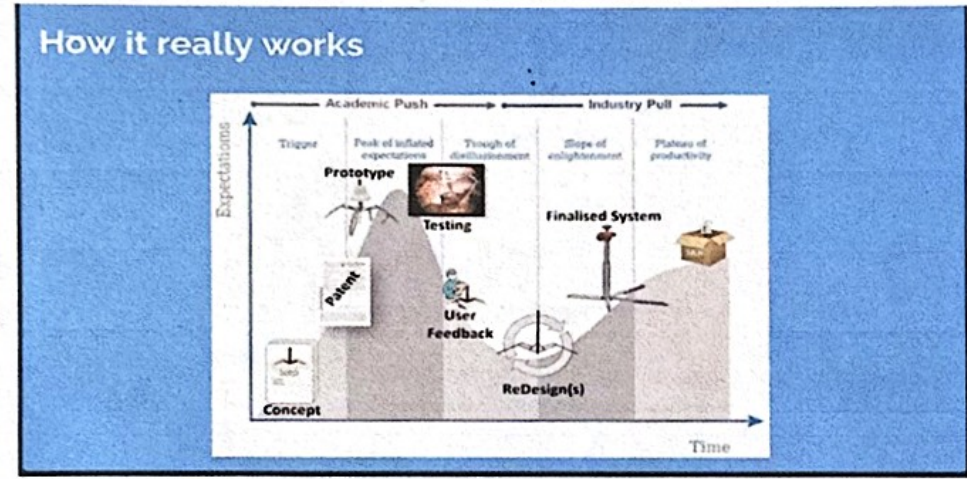

While the COVID-19 outbreak is continuing, more than 220 million COVID-19 tests are being administered each day. However, the rising demand for testing has led to a shortage of tests, and many of the tests are not accurate. This is putting health care workers at risk, as well as the public. UNLEASH Talent is addressing this problem with a simple, accurate, and easy-to-use testing device. The device is a lollipop-like device that can be used to test for COVID-19. It is made of plastic and has a small hole in the middle. The user simply inserts a swab into the hole and waits for the result. The device is easy to use and can be used in a variety of settings. It is also accurate, with a 95% accuracy rate. This is a significant improvement over other testing devices. The device is also easy to store and transport. It is a small, portable device that can be used in a variety of settings. It is also easy to use, and can be used by anyone. This is a significant improvement over other testing devices. The device is also accurate, with a 95% accuracy rate. This is a significant improvement over other testing devices.
