Outcomes of the Event: Virtual reality (VR) is a three-dimensional virtual environment that uses a headset or glasses to simulate realistic scenarios in the digital space, enabling learners to practice skills and understand the outcomes of their actions in a simulated environment. Augmented reality (AR), a related technology, enhances reality by overlaying it with digital information using lenses, enabling learners to, for example, see instructions while working on a machine. Both VR and AR are leveraged in training environments to reduce the risk and cost associated with training in certain environments, particularly in medical and compliance training.	
Remarks and Feedback on the Event: Good and Informative
